

# Juan Andres Bautista

+57 311 538 7248 | Bogotá, CO | [juanb.perez96@gmail.com](mailto:juanb.perez96@gmail.com) | [github.com/and-rs](https://github.com/and-rs) | [linkedin.com/in/and-rs](https://linkedin.com/in/and-rs) | [baut.dev](https://baut.dev)

## Skills

---

**Web Development** TypeScript, Node.js, PostgreSQL, React, FastAPI  
**Data Processing** Python, SQL, Pandas, Polars  
**Cloud Services** AWS (S3, EC2, Lambda, RDS), Terraform, Docker  
**DevOps** Git, Linux, Nix, Terminal Commands

## Work Experience

---

**Data Analyst / Engineer** May 2025 — Present  
LogicSource *Remote, US*  

- Build and maintain monthly procurement/spend pipelines on proprietary cloud using Python with validation and monitoring.
- Automated file loading and type checks to cut manual steps, reducing average pipeline run time and task duration by about 20%.
- Integrate and transform data from Oracle SQL sources, and produce reporting-ready models.

**Fullstack Developer** Dec 2023 — Apr 2024  
Freelance *Bogotá, CO*  

- Built a file-ingestion system that hashed streamed uploads and wrote to a local blockchain database for versioning. Used dockerized MinIO for storage, Bun + Hono for the backend, and SolidJS for the frontend.
- Developed custom business sites and portfolios with Next.js (SSR/ISR) and integrated CMS, analytics, and SEO.
- Shipped full-stack CRUD apps and set up CI and containerized services for consistent dev and prod environments.

**Frontend Developer Apprenticeship** Sep 2023 — Nov 2023  
HENRY *Remote, AR*  

- Built e-commerce features with React and Redux on an Express.js backend.
- Worked in a team using Git flow, opened PRs, resolved merge conflicts, and followed reviews.
- Learned production workflows such as state management, API integration, and testing while delivering sprint tasks on time.

## Projects

---

**Appointments App** [github.com/and-rs/appointments](https://github.com/and-rs/appointments)  

- Simple CRUD app but most importantly a showcase of AWS code as infrastructure with CDK and managed tooling versions with Nix. Database, Lambda and VPC setup, used Express.js for the backend and Next.js for the frontend.

**Caminatas (Trepas Cerros) WIP** [github.com/and-rs/caminatas](https://github.com/and-rs/caminatas)  

- Business site for a hiking/trekking event company. With content management and scheduling support, using a lightweight server-side focused stack; FastApi + HTMX + Jinja + Tailwind.

**Neovim Config** [github.com/and-rs/nvim](https://github.com/and-rs/nvim)  

- Created and currently maintain a neovim configuration with over 72 stars.

## Education

---

**HENRY** Aug 2023 — Feb 2024  
*Fullstack Developer Bootcamp* *Remote, AR*  
**Universidad De Los Andes** Aug 2023 — Dec 2023  
*Data Analysis Diploma* *Bogotá, CO*  
**C1 English Certificate**, British Council ([englishscore.com/verify](https://englishscore.com/verify)) Apr 2024  

- Verification ID: 527ed7aa
